

Central Desktop Extranets for Salesforce.com AppExchange Product Data Sheet

Product Summary

Central Desktop is an enterprise social technology platform that enables Salesforce users to create personalized Customer Extranets and Partner Portals. Central Desktop enables Salesforce users to collaborate with customers, partners and vendors in a structured, permission-based environment that is easily adaptable to your specific business needs.

Central Desktop provides a professional user-experience when collaborating with customers and partners by allowing Salesforce users to invite their customers into a private, invitation-only extranet.
